### PROJECTS

#### Shopping Spot

A simple full-stack e-commerce application built with MongoDB, Express, React, and Nodejs.

- Visitors can search, view product details, and read customer reviews.
- Only registered users can add/remove products to their wishlist, add their reviews of products, add items to the cart, and check out those items using the available payment methods (cash or credit) to provide the greatest convenience for the user.
- Users can register/log in immediately with their Google account.
