Al Balqa Applied University-Faculty Engineering Technology

2012-2016

## PUBLICATION

---

Mohammad M. Banat, and Aya M. Shiab. Distance Probability Density Functions in D2D-Enabled Cellular Ultra-Dense Networks. IEEE, MENACOMM, 2022.

## PROJECT

---

### Shopping Spot

A simple full-stack e-commerce application with a user-friendly design is built using MongoDB, Express, React, and Nodejs. It aims to provide different types of products at the same place and facilitate the product purchase process.

### Nigh

A social media platform is built with MongoDB, Postgres, Express, React, React-Redux, and Nodejs. It aims to help people stay in touch with their family and friends. As a social media platform, Nigh comes with a simple design to allow other users to design their profiles and pages with pictures and posts.
